Who We Are

HAISCO is an integrated engineering and oilfield services company supporting energy operators from well concept and design through drilling, completion, testing, workover and production start-up. We combine experienced engineering leadership, practical field operations and international equipment sourcing to offer clients a coordinated technical partner—not simply a supplier.

Our Vision

"To be a trusted regional partner for intelligent well engineering, safe operations and effective energy solutions across the Middle East and Africa."

Our Mission

"Deliver fit-for-purpose well solutions through rigorous engineering, disciplined execution, experienced personnel and responsive collaboration with clients and specialist providers."

Our Values

Safety and Well Integrity:
Prioritize people, barriers and responsible operations

Technical Excellence:
Apply sound analysis, engineering judgment and innovation.

Accountability:
Maintain transparent decisions, quality and delivery.

Collaboration:
Work as one team with clients, contractors and partners.

Customer Value:
Understand each client's objectives and deliver measurable customer value.

Integrated Engineering Service

1 Well Engineering & Advanced Design

Well architecture and drilling programs; vertical, directional and horizontal wells; slot recovery; Level 5 multilateral concepts; and dual-well designs from a common conductor configuration.

2 Downhole Problem-Solving

Stuck-pipe and failure analysis, 3D downhole fish visualization and recovery planning, fishing and milling, remedial strategies, and contingency design for complex operations.

3 Drilling, Cementing & Fluids Engineering

Casing and liner engineering, cementing and mud-system design, hydraulics and hole-cleaning modelling using our in-house hydraulic calculation program, and torque-and-drag assessments.

4 Field Operations & Management

Drilling Manager, superintendent and wellsite supervision support across drilling, workover, completion and testing; operational readiness, well integrity, HSE oversight, performance and cost control.

Products and Services

Well Stimulation & Production Improvement

Through our technology partners, HAISCO supports well acidizing and stimulation treatments designed to reduce near-wellbore skin damage in new and existing perforations. Applications include oil producers, gas producers and water-injection wells, subject to formation and treatment compatibility.

Tubulars & Oilfield Chemicals

Casing, tubing and other tubulars. Production chemicals include corrosion inhibitors and oxygen scavengers. Drilling chemicals and materials include salt, soda ash and other mud-treatment additives. Supply is based on approved specifications and project availability.

Products and Services

AZCO Drill Bits

Since 2012, AZCO drill bits have provided exceptional drilling performance for operators in North Africa and the Middle East. HAISCO Group, the owner of the AZCO brand, is proud to continue this legacy.

In collaboration with our engineering and manufacturing partners, HAISCO Group is pleased to introduce the next generation of PDC, Hybrid and Roller Cone drill bits.

Built on experience focused on the future

Established in 2012 as AZCO International and renamed HAISCO in 2026, the company builds on established expertise in well engineering, drilling services and oilfield equipment supply. Currently active in North Africa, HAISCO advances integrated engineering and energy solutions across the region.

QUALITY & HSE: Our work is guided by internal quality and HSE procedures and project-specific client requirements. Product-specific certifications are provided where applicable.

Detailed technical capabilities, personnel CVs, engineering examples and product information are available on request.
